

# Assembly Line Activity

1. Gather family members together and sit along one side of a table to form an assembly line.
2. Assign each person a specific part of the car. Parts include: Body, Door, Front Fender, Rear Fender, and Tires. If you do not have enough people for each part, double up on parts.
3. The first person should cut out the car body and glue it to a sheet of paper. Each family member should follow by cutting and gluing on their part, until the car is completely built at the end of the assembly line.
